

2D-2)

Are Your Beaches BlueTube™ Beaches?

BlueTubes are bright blue, easy-to-spot containers that hold bags. They are placed at beach cross overs so people can grab a bag on their way to the beach, pick up trash, and throw it away in the garbage cans at beaches. Beach goers donate their clean, used plastic bags to the container, and the cycle continues.

- Join the growing list of communities with BlueTubes on their beaches.
- There is nothing to buy.
- Sponsors pay for BlueTubes, fund research and raise awareness of plastic in the ocean.
- Beach goers clean beaches and replenish bags.

Together, we can be part of the solution.
