

## Keeping Your Home & Car Coronavirus Free

With COVID-19 spreading across the country, many Florida residents are increasingly concerned with keeping themselves healthy. One way to do that is by sanitizing both their homes and vehicles against the coronavirus.

Our team of experts put together a guide to help Florida residents properly sanitize their homes and cars and protect themselves against the virus. They also offered clarification on easily confused buzzwords during the pandemic. A look at what our guide includes:

- **How to sanitize your home:** clean frequently touched surfaces with bleach, alcohol, or peroxide every day including *toothbrush handles, tv remotes, and refrigerator/microwave handles*
- **Sanitizing your vehicle:** be sure to sanitize any spots you may touch including *seat adjusters, armrests throughout the car, and shift levers*
- **How to make an effective disinfectant** if you can't find them in the store
- **Tips from experts** from across the country
